

ELLA GREEN

Mid-Level Software Engineer | Fintech | Scalable Solutions

+1-(234)-555-1234 • Email • linkedin.com • <https://www.github.com> • Fort Worth, Texas

Summary

With 5 years of software engineering experience, excel in developing scalable fintech solutions using Java, Python, and Angular. Skilled at collaborating with cross-functional teams, delivering projects that enhance user satisfaction and performance. Notable achievements include a 30% performance boost through optimized code, leadership in successful cloud migrations, and consistent client success.

Skills

Java • Python • Angular • SQL • AWS • Microservices

Experience

Delta IT Solutions Fort Worth, Texas
Mid-Level Software Engineer 01/2024 - Present

- Developed and maintained fintech applications, increasing platform performance by 30% through optimized code.
- Collaborated with front-end teams to deliver user-focused financial features, enhancing customer satisfaction ratings by 15%.
- Supported cloud deployment processes on AWS, reducing downtime by 40% through automated scripts.
- Led code review sessions, improving codebase quality by 25% and mentoring junior developers in best practices.
- Executed database optimization initiatives that improved query performance by 20% using MySQL.

FinTech Solutions Hybrid - Remote + Office, Dallas, Texas
Full Stack Developer 06/2022 - 12/2023

- Built scalable web applications using Angular and Node.js, increasing client engagement by 40% within one year.
- Implemented RESTful APIs leading to a 50% improvement in data retrieval times from databases for users.
- Coordinated with cross-functional teams to design software solutions, contributing to a 20% increase in on-time delivery.
- Enhanced data analysis features of products, boosting end-user data processing speeds by 35%.

TechWorks, Inc. Austin, Texas
Software Engineer 05/2021 - 05/2022

- Assisted in pioneering microservices architecture projects, cutting load times by 30% across applications.
- Implemented full-stack solutions for client projects, achieving 25% more functionality at delivery.
- Collaborated with UX designers to improve interface layouts, increasing user adoption by 12%.
- Streamlined backend operations using Python, reducing server load by 15% and minimizing errors.

Education

The University of Texas at Austin Austin, Texas
Bachelor of Science in Computer Science 01/2018 - 01/2021

Projects

Financial Dashboard Open Source

Created an interactive financial dashboard allowing real-time analytics using Angular and Node.js. <https://github.com/fin-dashboard>

Automated Trading Bot

Developed a trading bot implementing machine learning algorithms to predict stock trends in Python. <https://github.com/trading-bot>

Key Achievements

Optimized Code Deployment

Reduced deployment time by 20% through automation, improving shipping efficiency and client satisfaction in 2025.

Increased User Engagement

Enhanced application features that boosted user engagement by 30%, contributing to increased revenues in 2024.

Successful Cloud Migration

Led a team for a successful cloud migration, reducing operational costs by 25% and enhancing performance in 2022.

Interests

Open Source Contribution

Actively contribute to open source software projects, focusing on fintech platforms and improving collaborative solutions.
